Introduction

The Land Down Under is based in Queensland. The map is built around accuracy, realism and immersion to bring you the experience of a real Australian outback trucker.

The map contains tons of custom assets and features, to name a few:

- 1:2 scale
- 3D outback roads to give the player an interactive experience with their truck and the roads they drive on. Your truck will be reacting with cracks, bumps, holes and lots of other variations on the bitumen or dirt.
- 3D bitumen roads also feature a realistic/common road width of 3.5m.
- Custom Australian AI traffic, on the left side of the roads.
- Custom garages.
- Custom companies.
- Custom truck dealers.
- Custom vegetation.
- Detailed locations.
- Accurate Road and navigation signs.
- Wildlife (Cows, kangaroos, camels & koalas)
- Railroad and water crossings.
- Support for various trailer mods.

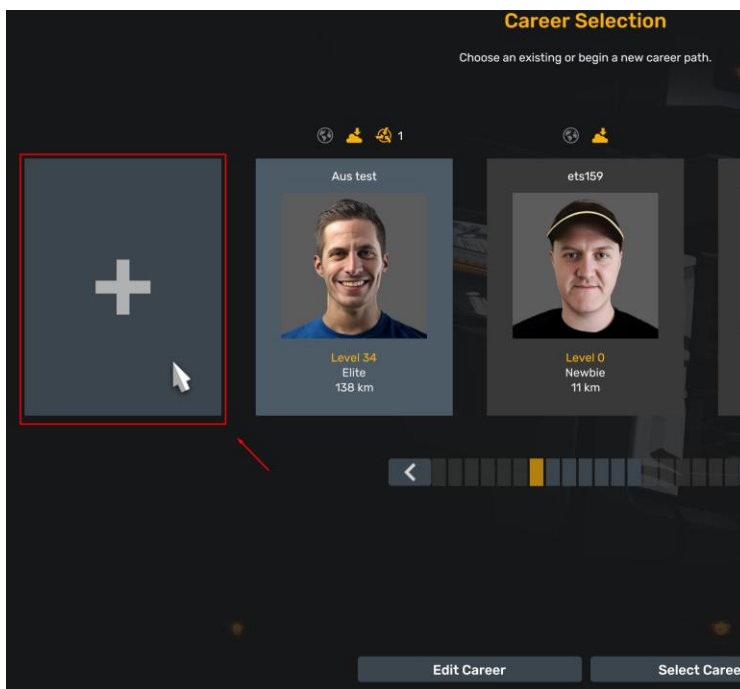

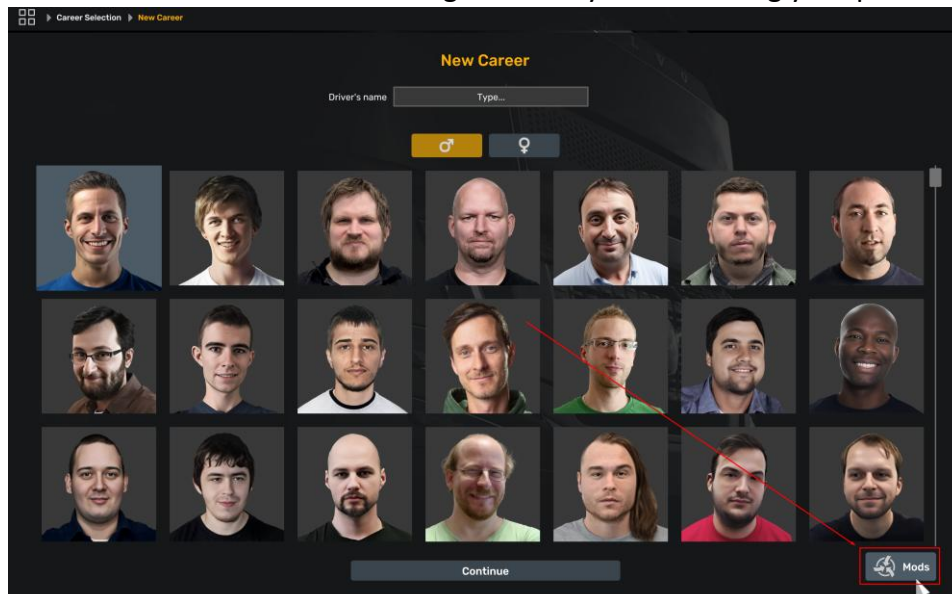

Installation

You have downloaded The Land Down Under, and you have opened the “The Land Down Under vX.X.rar”

- Step 1: The .rar file contains 1 file, called “The Land Down Under vX.X.scs”
 - Place this file in your “X:\Documents\Euro Truck Simulator 2\Mod”
- Step 2: Start Euro Truck Simulator 2.
 - Select “Change Career” in the main menu.
 - Make a “New Profile” in the career selection menu.

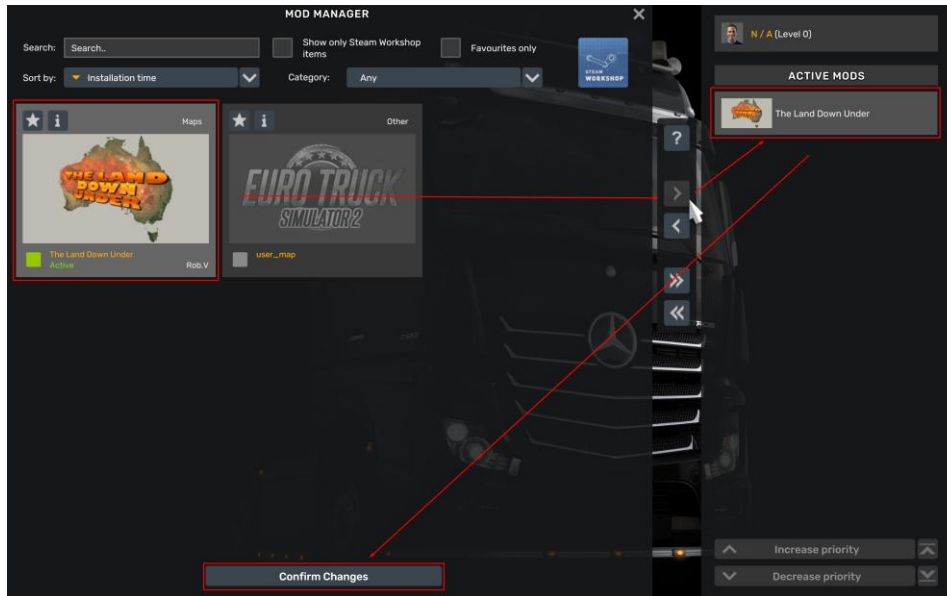

- Activate the mod in “mod manager” while you’re creating your profile.

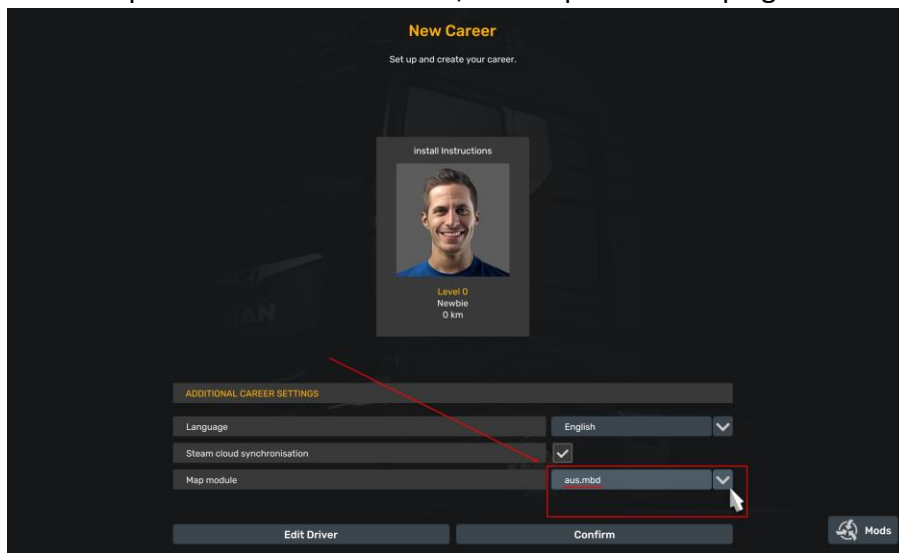

- Place the mod at the top priority of your active mods list.

- Select "aus.mbd" at the "Map module" option.

Is the Map module not selectable?, do the previous step again and activate the mod.

- Confirm & select your freshly made profile.

- Step 3: Select a city to start your journey in The Land Down Under.

- Step 4: Enjoy!

If you update to a newer version, you do not have to make a new profile.

If you want to install a newer version of the map (Example: replace v1.0 with v1.1);

- Step1: Place the new version in "X:\Documents\Euro Truck Simulator 2\Mod"
 - When you have placed the new version in your mod folder, remove the old version.
- Step 2: Start Euro Truck Simulator 2.
 - Open "mod manager" and remove the old version from the "active mod" list.
 - Now activate the new version and place it at the top of the load order again.
- Step 3: Chose the latest save, it will say you have the The Land Down Under missing.
 - Ignore that and continue with your save. It will load the new version.

Additional Information

FAQ

Q. - Need further help with installation?

- The games crashes!
- Or any kind of issue or feedback regarding The Land Down Under.

A. Be sure to ask for support on the Discord server!

Discord invitation link: <https://discord.gg/nRY84BENeV>

Q. Is it compatible with x and y map?

A. No, since the map is standalone and has its own module, it's not possible to enable other map modifications with it.

Q. Is the map compatible with x and y version of the game?

A. Check the description of the update.

Q. Is the map compatible with existing saves on vanilla maps?

A. No, you must make a new profile for this map, since it's standalone. Please refer to the installation instructions above.

Supported trailer mods & recommended trucks

These trailers have been made compatible with adding the company, in & out cargo definitions. Some trailers received their support on the old Australian Outback Map for ATS, might have to wait until they release them for ETS2.

- Drake O'phee Skel Container Trailer: <https://h3darts.com/#product?id=3> (Coming to ETS2 soon)

- KSW Livestock Trailers (If he releases them on ETS2)

Want your mod trailer to be compatible? Please send me a message on Discord.
