

From the name 'Another5_Mrd1', now it's my turn as Septian_MR to carry on this amazing legacy! It's a new little add-on map mod that contains an extensive rework of the West Balkans DLC map for Euro Truck Simulator 2 (ETS2).

This add-on offers a fresh take on the existing map, introducing new pathways, enhanced road networks, and undiscovered scenic landscapes that push the boundaries of exploration.

Map installation:

- It's generally the same way as other map mod's installations. Simply put a "**wbpd_addon_map_main.scs**" file into mod (directory) folder:
C:\Users\<your_PC>\Documents\Euro Truck Simulator 2\mod.
- To include with map combo, place this map somewhere on top of all other (addon) map mods in the Mod Manager menu. You can check examples from people who've made their own ETS2 map combos on YouTube or various forums.
